

GLEDHILL

SNOWPLOWS

“Jetstream™” Moldboard Reversible Models

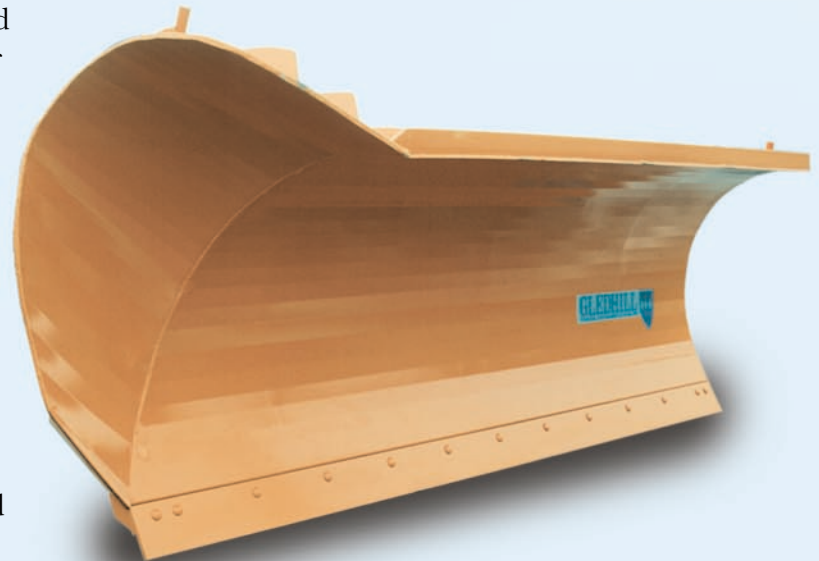

Gledhill has combined the perfected, inverted funnel shaped discharge ear snow plow, along with the features of a straight moldboard “built-in-baffle” snow plow. Our proven construction method utilizes a paneled moldboard that provides additional rigidity and efficient flow of snow.

Moldboards are available in center heights of 36”, 42” or 50” and in lengths of 10’, 11’, or 12’. Reversing Tables are available in three power reversible models, either the ‘PRT’, “PR2”, or the “PCL” Series, and a manual reversible model, the “RH” Series.

Also standard is our automatic safety trip device that utilizes open extension springs which allows the moldboard to tilt forward when the plow encounters a solid

obstruction. Cast mushroom shoe assemblies are provided with each Jetstream moldboard reversible plow.

36" height also available.
