## WINGS

Patrol Leveling Wings

Take a new look at the old job of fighting winter. Patrol wings have been proven in cost effectiveness and versatility because two clearing passes can be combined into one operation. Being less expensive and lighter than a full heavy duty wing allows for smaller truck usage, again saving on operational costs.

Our hydraulic patrol leveling wing saves you money though fewer parts, (we've designed our wing with two stronger cylinders instead of comparable wings with three.) That means less maintenance and down-time at the least opportune time, like when snow is demanding.

Gledhill's exclusive torsion spring cutting edge device allows the cutting edge to immediately swing back when

striking an obstruction, and then returns it to the proper plowing position. The trip cutting edge wing moldboard will prevent the wing from suddenly digging into excessively hard frozen banks and unfrozen earth. This provides less chance of damage to the wing moldboard and attachments

We've made our wing stronger. Overspecifying strength of materials means a rugged mount ready to take unexpected jolts inevitable to shoulder wing plowing.

Just another fine example of our product philosophy - "Build them tough for the ongoing battle with snow!"

## Patrol Leveling Wings

### Patrol Leveling Wings

WING MODEL	9FRPWTE	10FRPWTE
OVERALL LENGTH	9'	10'
CUTTING EDGE LENGTH	8'	9'
FRONT HEIGHT	28"	28"
REAR HEIGHT	38"	38"
MOLDBOARD THICKNESS	10 GA.	10 GA.
CURB SHOES	2	2
TRIP EDGE SPRINGS	3	4
PUSH ARM BRACE WITH SPRING	1	1
AVG. CLEARANCE UNDER RAISED WING (REAR)	94"	104"
APPROX. WEIGHT WING ONLY	920 LBS.	970 LBS.
APPROX. WEIGHT COMPLETE WING ASSEMBLY	2,060 LBS.	2,110 LBS.

**Options:** Engineered with a hydraulic cylinder, the wing post assembly will shift the required distance to permit full tilting of the truck hood. This allows fast access to the truck's engine compartment for maintenance or repair work.
